

best user application

PRICE: 4 CORE and 4 SID modules (SIDs and PICs, DIN/DOUT, IIC modules are not included, and the

best: they are blotted with original fingerprints of TK!

):http://www.midibox.org/midibox_sid_blm_photos/05.jpg

rules:

The “best user application” section is for those who have programmed something new for the MB hardware. You have to publish all your codes and to explain wich dedicated hardware is needed. You have of course to prove that your app work, so you are supposed to already own the hardware to run your app on.
