2025/07/13 07:45 1/1 contact

1. A point of junction in an electrical circuit. By mechanical or electrical means, they can be switched, on or off, closed or open. Contacts that when "closed" connect a pair of wires together and disconnects the wires when "open". A doorbell button is a simple example of a momentary contact closure.

2. A slang term for a mechanical relay or a smaller version of the same on a chip.
