

There will also be 2 remote consoles. Featuring:

- 20 buttons

Render of what it might look like

The remote consoles will only have a DINX3 and a DOUTx3 inside. They will patch into the DIN/DOUT chain via Cat5 at the main console. Software is stock standard 64e.

*This project is still in the very early stages of construction.*

## Shortcut Trigger for Enttec Light Factory

I'm building this for a friend who wanted access to flash buttons for Light Factory (PC based DMX lighting controller), without spending thousands on the wings.

## Where I Shop

**Rockby, Clayton** <http://www.rockby.com.au/>

Great prices, Heaps of stuff.

I get: Resistors, Capacitors, Pots, LED's, Buttons, all the misc stuff like IC Sockets, pin headers, etc

**Smash TV** <http://www.avishowtech/mbhp/>

You should already know all about this place

I get: Pre-burned PIC's, Circuit Boards, Encoders.

**Futurlec** <http://www.futurlec.com/>

Great prices, very resonable shipping, Easy to use website

I get: IC's (Shift Registers, Opto-couplers), LCD's. As I often place orders here I usually grab some misc parts as well

**Jaycar** <http://www.jaycar.com.au/>

Big stores with lots of stock on display. Prices not so good. But can be really helpful to go in and play with buttons, or check out parts before purchasing.

Also open all weekend!

I get: the stuff I forgot to order from other places!!
