**MIDI ROUTER**

[Midi Router on ucapps](#)

Type midirouter or midi router or midiro* (for mis-spellings) [here](#) to search forum.

**Add links to photos!**

- Please, if you decide to build a midirouter, take some photos before and after you put it in a case. Add them to a new forum topic and link[1] it from here. Add any other info like what version of board was used and midirouter version etc…it helps newbies a lot.

- Also, if you are reading this and have built a midirouter that you created, it'd be cool if you take a photo too and insert a link to it from here.

[1]
It's easy to insert a link, first sign in, click on the 'edit this page' button, then type 2 square open brackets, paste your url, and type 2 square closed brackets.
