

Open Source Hardware

Other cool open source projects from around the net.

- theutis.com - Open-Source MP3 player to listen to your MidiBox music on.
- [Yampp](http://yampp.org) - yet another Open-Source MP3 player.(this one has USB capabilities)
- [Arduino](http://arduino.cc) - An open-source physical computing platform very cool programmable I/O board.
- [Wiring](http://wiring.org) - Wiring is an open source programming environment and electronics i/o board for exploring the electronic arts, tangible media, teaching and learning computer programming and prototyping with electronics.
- [Ronja](http://ronja.org) - Ronja is a free technology project for reliable optical data links with a current range of 1.4km and a communication speed of 10Mbps full duplex.
- [Fab@home.org](http://fabathome.org) - prototyping tool!!! (this is just cool)

Circuits

Circuit designs that can be incorporated into projects.

- [RIAA Compensated Stereo Preamp](http://www.midibox.org/dokuwiki/riaa_compensated_stereo_preamplifier) - A turntable preamp board and circuit design. usefull if you want to make a Traktor mixer/Controller with an optional turntable input.
