2025/11/12 18:36 1/1 Dual SSM 2044 PCB Bulk Order

Dual SSM 2044 PCB Bulk Order

This page is about Seppoman's bulk order for the ssm2044 pcb.

More information and sound demos can be found here and here.

Warning: This is not a suitable project for absolute beginners. The soldering isn't very difficult, but you will need either an AOUT_NG (SMT soldering required), an AOUT module (which needs to be expanded with the bipolar option) or two (!) AOUT_LC modules, or another type of CV source to control this module, in addition to the actual synth (SID/FM) you want to use it with. So a bit of soldering experience and knowledge about the MidiBox platform is definitely recommended.

The original bulk order is closed. I might start another bulk order this year if there's enough demand. You can express your interest in getting PCBs by adding yourself to the list below. Note that I don't promise to start this bulk order at any specific time of year, so please don't send me PMs about that - I'll collect orders from everyone on the list and will announce the bulk order on the forum as soon as something is happening!

Username	Number of PCBs
rosch	10
modularman	4
henrikgo	1
kroutshev	2
Strophlex	6
booster	2
jooks	2
kok6	2
iorobyy	2
lead bromide	2
