Custom Wound Toroidal Transformer Group Buy (proposed but possibly imminent)

The proposal is to buy a fairly large quantity of Toroids with not just 110/220V inputs with dual 15V secondaries, but to add in a third set of secondary windings for 5V. This way, we won't have to chain a 7805 regulator after a 7815 and try to burn off 10V in heat. I intend to buy at least 100 of these for the next batch of MB-808 kits, so I thought I'd spread the love and give other people the chance to get one of these custom wound transformers.

Price will depend upon quantity, but I'm hoping for less than $20 US per toroid…

Click on the “Edit this page” button (top left corner) and add your MIDIbox username and the number of toroids you would like.

ADD YOUR NAME AND QUANTITY TO THE END OF THE LIST

DO NOT DO ANY OTHER EDITS TO THIS PAGE

Adding your username and quantity is not a commitment to purchase them if/when I have them available to sell, however, if you change your mind, please come back here and change/remove your list entry.
