# MB-ModulBox NG

*Under Heavy Developpment @ **15/8/2016***

Introduction

The MB-Modulbox-NG Project is a modern version of the **Modulbox** project .
In short words, it's a **Eurorack-size compliant Modular MIDIbox Control Surface** based upon MB-NG.

From a **Main Part,small modules would be chained to Build the custom-sized control surface of your dreams by choosing the MIDI controls you want**.

Main part would also allow **Access to Menus for configuring and saving things on SD Card** , and optionnal **External Analog Inputs/Outputs** to trigger from external sensors and/or drive your analog synth.

Each Small Module will have a Different type of Interaction and will include Digital Shift Registers and/or Multiplexers For Analog lines . Then modules would be chained one to another up to main part.

Modules **Chain Connectors will be 2.54mm dual row pinheader** (Molex?) and will carry Digital/Analog bus lines and Current supply. PSU Main input will be on main part PCB.

Main Part Features

1. **STM32F4 Board**
2. **Standard Control Surface** with 6 Tactile switches, Push - Encoder ,**OLED** Graphical screen
3. **SD Card Slot** (+USB in?)
4. **2xMIDI IN + 2xMIDI OUT 2.5mm jack Plugs**
5. **Optionnal 16×3.5mm jacks** for external **Analog Ins**/**Analog Outs** with External interfaces for expanding.

Community users working on it

- **Ksir** - Modulbox Original Designer - PCB Design - Programming
- **Psykhaze** - Documentation - Frontpanel design - PCB Design - Programming
- **Latigid On** - PCB Design -Troubleshooting Help

Getting Involved ?

Just let a Private message on the forum to users already involved

Software Tools used

- **Inkscape Vector Drawing Software** - Front panel Concept Drawing
- **KiCAD PCB** - PCB Design | **KiCAD Librairies**
- **FreeCAD 3D Technical Drawing** - Case Design
- **Code::Blocks Integrated Development environment** - GUI Software - MIOS programming
- **JUCE** - Cross-Platform Audio/MIDI/GUI Library

PCB process

1. ~~Parts List - Datasheets Gathering - Reference selection~~
2. KiCAD Library
3. Schematics
4. FootPrint Creation / Association to schematics
5. Netlist Export
6. Make Pcb routing - Put pinheader/jumper to Strategic Troubleshooting Places.

Architecture

Modulbox-NG
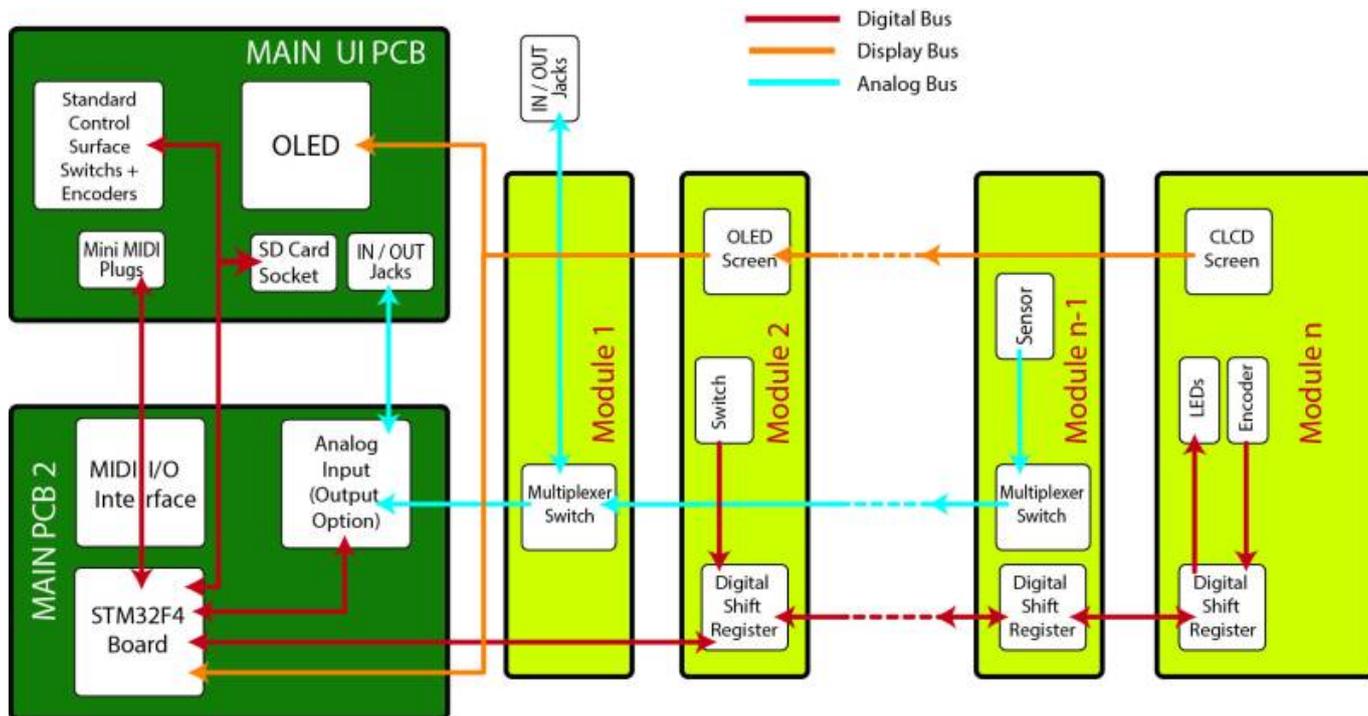

Eurorack design

- **Eurorack Design is 3U Height** So frontpanel =*5,25"=133mm-rails=***128,5mm** Height .
  Sandwich Design is ok here due to non heating components and allow to spare space.
- **Modules Frontpanels are 8HP-multiple wide** *(8HP=***40,3mm***)* see ***Eurorack Specification***.
  Frontpanel back spacers glued with JB-weld to avoid front screwing. **Eurorack Templates PDF**
- **PCB Size is 100mm height** To stay compliant to ***Eurocard Specification***

Software / Firmware

- **JUCE Ressources**

A **GUI** will be developped with JUCE Library to make your **MIDI mapping** upon your custom control interface and make your **custom infos display on OLED / CLCDs / LEDs Matrixes**. Upon a list of **Pre-made functions**,you would be able to connect a **MIDI mapping** to Controller / Sequencer / Other MIDIbox apps functions into the JUCE GUI

TODO: Make a inkscape sketch For the JUCE GUI then remake it with **Projucer**
