Welcome

This page and the other pages throughout entire new_wiki_layout:* namespace are just a template. Don't edit these pages. The new pages should be laid out like these.

See this thread for info: [Re: Programming Platforn / Old PIC info / Can of Worms](#)

UPDATE: as discussed in [this](#) thread, namespaces for the new wiki are organized like this:

- top namespace 'home' for all midibox-wiki-pages
- top namespace 'wikify' for all information about creating/editing wiki-pages

refer the [wikify](#) - page to see how namespaces are organized. This way the new wiki can be built up in parallel to the existing one without having pagename-conflicts. When the new wiki will go live, only the ':home:home' - page has to be moved to 'home'. On the new home, all the links are already mapped to the new namespace-concept. Also the templates in the 'new_wiki_layout' - namespace have all the links mapped to the right pages (except if they link to another template).

The 'home' page which will replace the original is basically a copy of this one, but of course the namespace has been removed. You can find it here: [home](#)
