

## Dual SSM 2044 PCB Bulk Order

This page is about Seppoman's bulk order for the [ssm2044\\_pcb](#).

More information and sound demos can be found [here](#) and [here](#).

**Warning:** This is not a suitable project for absolute beginners. The soldering isn't very difficult, but you will need either an AOUT\_NG (SMT soldering required), an AOUT module (which needs to be expanded with the bipolar option) or two (!) AOUT\_LC modules, or another type of CV source to control this module, in addition to the actual synth (SID/FM) you want to use it with. So a bit of soldering experience and knowledge about the MidiBox platform is definitely recommended.
