

TM5-DinDoutGates

this is one essential part for my [triggermatrix5](#)
it gives 24 Digital Inputs, and 32 Digital Outputs, while 16 Outputs are used for UI, the other 16 are buffered, and are for use as 16 GATe/Triggger output at 5V Level
i created this board. its fully SMD, and made it pick and place ready - so no soldering required!
